

Sohaib Akmal

Software Engineer in Test

📍 Islamabad, Pakistan | 📞 +92 333 5254654 | ✉️ sohaibakmal9@gmail.com | 🔗 <https://www.linkedin.com/in/sohaibakmal>

Profile

Software Engineer in Test with 5+ years of experience in developing automated test scripts using Cypress and Playwright with JavaScript. Skilled in designing end-to-end testing strategies, API testing with Postman and JMeter, and validating performance and functionality. Experienced in feature testing and ensuring high-quality, on-time releases.

Experience

Synergy-IT

Sept 2025 – present

Senior QA Engineer

- Automating front-end testing using Playwright to ensure UI functionality and reliability.
- Designed and implemented API automation test suites using ReadyAPI.
- Conducted API performance testing with Apache JMeter to evaluate load, stress, and scalability.
- Performed API validation using Swagger and database testing to ensure data integrity.
- Executed comprehensive backend system testing to verify business logic and integrations.

Elixir Technologies

Oct 2023 – Sept 2025

Software Engineer in Test

- Developed and executed end-to-end automated test scripts of a SaaS web application using Cypress and JavaScript to improve efficiency.
- Supported CI/CD processes via Jenkins, Utilized Lens to monitor pod status and analyze logs for debugging service-level issues in Kubernetes environments.
- Conducted functional testing of new features and investigated customer-reported production issues.
- Writing and managing test cases for new features in Jira.

MRS Technologies

July 2022 – Sept 2023

Software Quality Assurance Engineer

- Developed end-to-end (E2E) automation scripts for web applications using Cypress with JavaScript.
- Integrated test scripts on the test branch using GitLab for version control, ensuring seamless collaboration.
- Conducted thorough API testing of web applications using Postman, validating endpoints and ensuring functionality.
- Integrated API test suites into CI pipelines with Postman, ensuring continuous validation and robust API testing.
- Tested web applications for real-time connected devices data configuration and monitoring, including telematics data management, geofencing, and alerts.

MTBC - CareCloud

Dec 2020 – Jun 2022

Software Quality Assurance Engineer

- Testing of developments and enhancements in multiple web applications, ensuring quality releases.
- Utilized Postman for API testing of web application, validating endpoints and functionality.
- Performed database testing and load testing using JMeter, ensuring database performance and reliability under various load conditions.
- Developed and executed end-to-end (E2E) automation tests using Cypress, enhancing the testing efficiency and coverage of web applications.

Software Quality Assurance Engineer

- Created and executed detailed manual test cases for web applications, ensuring comprehensive test coverage.
- Conducted thorough testing of new developments and enhancements, aligning with client requirements and specifications.

Education

Bachelor's in Computer Science

2015-2019

Comsats University Islamabad

Technical Skills

- Automation Tools/Frameworks:
 - Cypress
 - Playwright
 - Postman
 - JMeter
 - Swagger
 - BDD
 - Jenkins
 - Git
 - Lens
- Programming Language:
 - JavaScript
- Testing Expertise:
 - Black box testing
 - Test Automation
 - Test Case Design
 - Test Management
 - Test validation
 - API Testing
 - Agile Testing
 - Stress Testing
 - Cross Browser Testing
